

Filipe Molina de M. Vieira

Senior Software Engineer · Frontend / Full-Stack

Winnipeg, MB · +1 431 844-1109 · filipemolina@live.com · github.com/filipemolina · linkedin.com/in/filipemolina15

SUMMARY

Senior software engineer with over 10 years building scalable web applications across SaaS, edtech, and high-traffic consumer platforms including Skip the Dishes, PowerSchool, and Knak. Specializes in React and TypeScript frontends, GraphQL, and modernizing monolithic systems into service-oriented and microservice architectures. Recent hands-on experience integrating LLM providers (Claude, ChatGPT, Gemini) into production SaaS. Proven track record leading frontend architecture and mentoring engineers.

SKILLS

Languages: JavaScript, TypeScript, Go, PHP, C#, Python, HTML, CSS

Frontend: React, Next.js, Vue.js, styled-components, Tailwind CSS, shadcn/ui, Ant Design, Vite

Backend & APIs: Node.js, Laravel, GraphQL, REST, service-oriented & microservice architecture

Databases: PostgreSQL, MySQL, SQL Server

Architecture & Practice: Solution architecture, application modernization, system analysis & design, SDLC, requirements analysis, code review, team leadership & mentoring

EXPERIENCE

Senior Frontend Engineer — Knak Inc.

2025 · Remote

- Built the frontend for new AI features in a company-wide SaaS email editor, integrating multiple LLM providers (Claude, ChatGPT, Gemini) into production workflows.
- Collaborated with a cross-functional team to align new features with enterprise architecture standards.

Senior React Developer — PowerSchool Inc.

2021 – 2024 · Remote

- Provided frontend architecture leadership on a major modernization effort, migrating a monolithic application to a microservices architecture.
- Designed and built a GraphQL server as an orchestration and integration layer across disparate microservices.
- Contributed to system analysis and solution design for a mobile app improving communication between teachers, students, and parents.

Senior React Developer — Skip the Dishes

2018 – 2021 · Winnipeg, MB

- Led solution design and development of a new menu-builder tool, introducing GraphQL as a core technology at the company.
- Key contributor to the solution architecture of a business-critical application later adopted internationally.

Systems Analyst — Mesquita City Hall

2015 – 2018 · Rio de Janeiro, Brazil

- Established and led the city government's first in-house development team, mentoring junior developers.
- Served as technical consultant to business users, leading feasibility studies and requirements analysis for medium- and large-scale applications.
- Designed three solutions that modernized citizen-government interaction.

Earlier experience: Web Developer at 3A WorldWide and Agência Frog (Rio de Janeiro, 2012–2015) — developed web applications for a range of clients and introduced SDLC best practices including version control and code review.

PROJECTS

Stack Stitcher — Open-Source TUI · Go

github.com/filipemolina/stack-stitcher

- Terminal UI for managing self-hosted Docker Compose stacks, built in Go with Bubble Tea and Lip Gloss (Charm).
- Parses standard Compose files via the official compose-go spec library; features fuzzy service search and clipboard support.

EDUCATION

Bachelor in Information Technology — Universidade Castelo Branco · 2005–2009
